

**MOOG**  
**Drives Product Line**  
**Product Obsolescence Announcement**

Dear Customer,

1. From PLM:

This memo outlines the Obsolescence details of the following Product(s):

T200-300, -310, -400, -410, -500, -510, -610 & -710 Servo-drives

The reason for the obsolescence of this product is:

general end of life.

End of Life Announcement date: 24-Sept-10

Final date for receipt of T200 POs: 30-Sept-11

Final date for last delivery of product: 30-Sept-12

Date of last repair/ Obsolescence: 30-Sept-16

The Drive Product Line will not accept orders for new product deliveries after the "*Final date for receipt of T200 POs*" as documented above.

Repairs will be available until the "*Date of last Repair*" as outlined above, after that point the products listed above will be marked obsolete and Moog will not be able to deliver new products, refurbish products nor repair any of these products.

The replacement product is as follows (if available): MSD or CSA.

Please forward on the forecast for future deliveries (see following section), to the Drives PLM be received no later than, 30-Sep-11;

Please note that while every attempt will be made to deliver the quantities requested, factors such as parts availability may limit the ability of the Product Line to deliver requested quantities. Any shortfall will be communicated to the sales organisation.

2. To Addressee:				
Product quantities per Year (for the next <span style="background-color: black; color: black;">[REDACTED]</span> years)				
	Fiscal year			
Type Identifier <sup>1</sup>	FY'11	FY'12		
Comments:				

Many thanks for your help in this important process.

Kindest Regards

Ernest Keeffe  
Moog Servo Drives Product Line Manager
