

EXTENDED WARRANTY PROGRAM

Keeping your business more productive and eliminating the extra cost of unplanned downtime

For almost sixty years, Moog servovalves have delivered reliable, high performance axis motion control in a wide range of machines and industries. Today, Moog can offer you an extra measure of coverage for your servovalves with our new Moog Extended Warranty Program.

The Moog Extended Warranty Program provides total warranty coverage for one full year (or for the equivalent number of working hours) beyond the expiration date of your original product warranty.

This warranty can also be applied to servovalves having undergone a Moog high level service.

COVERAGE WITHOUT DISRUPTION

One of the best features of the Moog Extended Warranty Program is that no additional inspection of the servovalves is required. The warranty will begin while the products are in place and running, requiring no extra effort on your part.

The Moog Extended Warranty Program keeps your business more productive and eliminates the risk of extra cost in case of unplanned downtime.

NOT ONLY SERVOVALVES

Moog Extended Warranty is not restricted to just your servovalves. Please ask us how this preventative maintenance program can be extended to other Moog products such as pumps, servoactuators, servodrives and servomotors.

PEACE OF MIND—AND MORE

The Moog Extended Warranty Program is designed for demanding manufacturing professionals who understand the value of additional coverage. The program offers key advantages including:

- Better management and control of your maintenance budget through proactive planning.
- No surprises or unforeseen downtime due to repair complications.
- Full service coverage by the company who designed and manufactured the servovalve; no one knows the product better.
- Simple to implement - all you need to do is extend your existing warranty.
- Priority repair service - in the unlikely event that you will need it.

Our service programs are tailored by country and customer to meet unique requirements. A specific service may not be available in all locations or to all customers. Please contact your nearest Moog facility for further information.
