

PATIENT INFORMATION GUIDE

Intermittent Therapy
—Curlin 6000™ V2.01
CMS Infusion Pump

This reference will help you remember the steps your clinician has shown you about infusing your therapy using the Curlin 6000 CMS Pump.

1. Turn the pump on by pressing the orange ON/OFF key.

- 2. The pump will run through a series of self tests. One of the screens will display a bar that represents the power left in the batteries. (Replace batteries with Duracell ProCell C-cell batteries when 1/3 or less of the bar remains).
- Highlight PROGRAM using the up or down arrow keys. Press the YES key.

NOTE: Program mode may or may not be enabled.

NOTE: Pressing the **YES** key selects and confirms the highlighted line.

ENTER TO SELECT PROGRAM LIBRARY

NOTE: If instructed to use a medication in the Protocol Library, select LIBRARY. Select REPEAT Rx then press the YES key.

The next screen may look like one of the following screens:

REPEAT Rx

(To hang a new bag with the same prescription or to begin the initial bag.) Press **YES** to **REPEAT Rx**.

ENTER TO SELECT
REPEAT RX
NEW PROGRAM

When you press the YES key to select REPEAT Rx, the cursor will automatically advance through the lines. You can stop the scrolling and revert to manual by pressing any key (except ON/OFF), then manually confirm each field by pressing the YES key at every line.

I N T	UNITS:

П	NEXT DOSE:	
N	DUE IN [] HH:MM	
Т	DONE? YES	

The last screen of the program indicates how long until the next dose starts delivering. Be sure you are connected to the pump prior to this time.

When the following screen appears, press the **RUN** key.

PRESS
RUN to START
NO to REVIEW
OPTIONS or PRIME

NOTE: Selecting
REPEAT Rx while a dose
is in progress will drop that
dose. Therefore hang the
new bag prior to the dose's
delivery time.

RESUME

(To restart infusion that is not finished) Press **YES** to **RESUME**.

RESUME
REPEAT RX
NEW PROGRAM

(NOTE: Do not arrow down to NEW PROGRAM.

If selected, turn pump off and on again.)

If you selected **RESUME**, the following screen will appear. Press the **RUN** key.

PRESS

RUN to START

NO to REVIEW

OPTIONS or PRIME

Whenever your therapy is infusing, the following screen displays and the green status light blinks.

If a delayed start is programmed, the following screen will display:

INFUSION	WILL
START IN:	HH:MM
KVO RATE:	mL/HR

DELAYED START

NOTE: If the pump is turned off while a dose is in progress, turn the pump back on within 30 minutes to maintain the same schedule.

Tip: Green light blinks when the pump is running.

Yellow light blinks when the pump is paused.

Red light blinks when there is an alarm.

To resolve the alarm: Read the alarm, press the **PAUSE** key, resolve the alarm, then press **YES** to **RESUME** and **RUN** to start.
