Date: May 5, 2020

Subject: Authorization of FAA-certificated Repair Stations located outside the United States with a revised capability list dated 8th April 2020

Dear Mr. Ronnie Jay P. Ramos,

This letter authorizes MOOG CONTROLS CORPORATION FAA certification No. 063Y132Y to perform maintenance and modifications on aeronautical products, excluding aircraft, under TCCA regulatory control pursuant to Section B, Paragraph 4.0, of the FAA/TCCA Maintenance Implementation Procedures (MIP).

This authorization is limited to aeronautical products manufactured by MOOG Inc. and the work performed must be within the ratings and limitations contained in your 14 CFR Part 145 certificate, operations specifications and capability list Form 303, revision date – 8th April 2020. Any changes applied to your certificate, operations specifications, or capability list will invalidate this authorization and a new authorization request will be required by TCCA.

This TCCA authorization shall remain in effect until MOOG CONTROLS CORPORATION FAA Repair Station Certificate expires, October 31st, 2020, or if the certificate has been surrendered, suspended or revoked. In order to renew this authorization, TCCA requires MOOG CONTROLS CORPORATION to provide their renewed certificate, and demonstrate compliance with the MIP Section B, Paragraph 4.1, as part of their new authorization request.

Regards,

Gary Voght
Civil Aviation Safety Inspector
Operational Airworthiness, Standards
