Over the last 65 years, our engineers have developed the capability to design and manufacture the most advanced motion control products for aerospace, defense, industrial and medical applications – applications where precise control of velocity, force, acceleration and fluid flow are critical. Our motion control portfolio has expanded to include all forms of actuation technology, sophisticated control electronics and system software.

Our strategy is to supply highly customized motion control solutions that are robust, reliable and supportable. We do this across a broad range of applications – from undersea to space – where performance really matters. With this strategy, we’ve grown from being a high technology components supplier to become a leading integrator of precision motion control systems.
