Contents:

1.0	Scope.....	2
2.0	Introduction	2
3.0	Reference Documents	2
4.0	Process Specification Listing	2

1.0 SCOPE

- 1.1 This document covers the issue status and process specification departures (PSD) applicable to Boeing specifications used on make-to-print parts for Moog Wolverhampton.
- 1.2 The listing is designed as a look up tool for Supply Chain to determine the latest specification and departure issue which is needed for manufacturing on make-to-print parts for Moog Wolverhampton.
- 1.3 Where industry process specifications are used in the manufacturer or other supporting processes related to make-to-print parts for Moog Wolverhampton, e.g. AMS-QQ-P-416 or ASTM B117 then these shall be obtained directly by the supplier.

2.0 INTRODUCTION

- 2.1 The listing is not exhaustive. Requests to add further Boeing process specifications should be made through the Moog purchasing contact.
- 2.2 When a supplier requires a copy of a particular document the request shall be made through the Moog purchasing contact.

3.0 REFERENCE DOCUMENTS

Whenever a specification is referenced as PS xxx, then this shall imply the in-house standard of Moog Wolverhampton. Specifications from other companies or institutions shall be given a suitable prefix to identify the source.

<http://active.boeing.com/doingbiz/d14426/index.cfm>

4.0 PROCESS SPECIFICATION LISTING

- 4.1 In the tables below only PSDs that apply to Boeing Commercial Airplanes are shown, i.e. only those beginning 1-xxx and 6-xxx. From July 2020 newly released PSDs are numbered 1-xxx and those numbered 6-xxx will be replaced or incorporated over time. For those specifications with an associated Qualified Products Listing (QPL) the revision status of this is given in the PSD column. Items marked with a ★ have been updated since the last revision.
- 4.2 In the column “Date of most recent update” a date of 7-Aug-18 represents the date at which the initial issue status data was gathered for this document. Additionally, the date given is the date of the notification from the Boeing specification website which will be one day later than the date that appears as the “release date” on the document.
- 4.3 Primary specifications (marked with a ‘P’) are those which are directly called-out from the part drawing. These specifications are controlled within MBS with a link to each part number where they apply. Other specifications are secondary, i.e. called out from within the primary specifications. These are not controlled within MBS.
- 4.4 All PSDs have a revision level of -, unless otherwise specified.

4.5 Documents with the following prefix are included in the table below:-

- BAC (Boeing Airplane Company)
- BMS (Boeing Material Specification)
- BSS (Boeing Specification Support Standard)
- D2 & D6

4.6 Date range of notifications included in this revision:-

4.6.1 Oldest 14-Oct-2022 (BAC5641)

4.6.2 Newest 20-Jan-2023 (BAC5875 & BAC5307)

4.7 For new entries (marked with change bar in the right-hand margin) the date given is:-

4.7.1 The date of release of the newest 1-xxx or 6-xxx PSD or

4.7.2 The latest revision if there are no 1-xxx or 6-xxx PSDs.
