*TPR as listed on the data sheets, is for an un-mounted condition unless otherwise noted. Mounted TPR values are often 50% or less than the un-mounted TPR. For air flow, the TPR may be less than 25% the un-mounted amount and for fluid cooling it may be 10% or less. Many factors affect the TPR value and its change relative to the mounting or external cooling applied. Consult the factory for a more accurate estimate of the motor's TPR.

**Stack lengths from 0.25 to 16.00 inches (6.35 to 406.4 mm) with K_T to 717 N.m/amp
