

## SPITFIRE SERIES

GIGABIT ETHERNET, MIL-DTL-38999, 1000BASE-T / SX MEDIA CONVERTER, MULTIMODE, 850 nM, 3.3 VDC

Spitfire series Gigabit Ethernet media converters consist of optoelectronic transmitter and receiver functions integrated along with the 1000Base-T electrical to 1000Base-SX optical media conversion circuitry into a wall mount MIL-DTL-38999 connector assembly.

The optical transmitters are high output 850 nM VCSEL lasers. The optical receivers consist of GaAs PIN and preamplifier assemblies and limiting post-amplifiers.

The electrical interface to the Spitfire series optical media converters is a ribbon coax to Samtec EQCD high density cable assembly enabling SMT interconnection to a customer's backplane, motherboard or daughtercard.

Spitfire series Gigabit Ethernet media converters are vibration isolated, environmentally hardened components designed for use in harsh environment applications.

- External interface sealed against liquid or solid contaminants
- Shock and vibration resistant

MIL-DTL-38999 Optical to Samtec SMT Electrical

## FEATURES

- Compliant with IEEE-802.3:2005 Gigabit Ethernet 1000Base-SX and 1000Base-T
- Optical fiber link distances up to 550 meters (50 / 125)
- Operating temperature range from -40° to +85° C
- Shock, vibration and immersion resistant per MIL-STD-810
- Olive drab cadmium plating meets stringent EMI / RFI and corrosion resistance performance specifications
- Aluminum housings are strong, durable and light weight
- MIL-T-29504 compliant optical fiber connector interface
- MIL-DTL-38999 fiber optic insert per MIL-STD-1560
- Samtec EQCD series electrical connector for SMT interface

## APPLICATIONS

Spitfire series bulkhead mounted Gigabit Ethernet media converters enable high speed network communications over long distances in harsh environments.

- Gigabit Ethernet switches and peripherals
- Telecom and datacom switch / router rack-to-rack links
- Storage or computation clusters

The MIL-DTL-38999, series III shell provides a sealed optical interface that is water-tight to MIL-STD-810 when mated.

The multimode optical fiber interface supports applications where copper cable link distance, bandwidth, weight or bulk make the use of twisted pair, twinax or quadrax copper conductors unacceptable.

## ABSOLUTE MAXIMUM RATINGS

Absolute maximum limits mean that no catastrophic damage will occur if the product is subjected to these ratings for short periods, provided each limiting parameter is in isolation and all other parameters have values within the performance specification. It should not be assumed that limiting values of more than one parameter can be applied to the product at the same time.
