

MUSTANG SERIES

FAST ETHERNET, TFOCA II®, 100BASE-TX / FX MEDIA CONVERTER,
MULTIMODE, 1310nm, USB POWERED - 5.0 VDC

Mustang series Fast Ethernet media converters consist of optoelectronic transmitter and receiver functions integrated along with the 100Base-TX electrical to 100Base-FX optical media conversion circuitry into a jam-nut TFOCA II® style fiber optic connector assembly.

The optical transmitters are high output 1310nm devices. The optical receivers consist of InGaAs PIN and preamplifier assemblies and limiting post-amplifiers.

The electrical interface to the Mustang series optical media converters is a MIL-DTL-38999 cylindrical connector enabling interconnection to a cable assembly for USB power and Ethernet signal sources.

Mustang series Fast Ethernet media converters are vibration isolated, environmentally hardened components designed for use in harsh environment applications.

- Sealed against liquid and solid contaminants
- Shock and vibration resistant

SINGLE PORT MUSTANG SERIES *TFOCA II® CONNECTOR, 100BASE-TX TO 100BASE-FX MEDIA CONVERTER, MULTIMODE, 1310NM, USB POWERED (5.0 VDC)

Single Port, Jam Nut, USB Powered
TFOCA II to D38999 / Optical to Electrical Media Converter

FEATURES

- Compliant with IEEE-802.3:2005 Fast Ethernet 100Base-TX and 100Base-FX
- Optical fiber link distances up to 2.0 kilometers
- Copper Ethernet link distances up to 100 meters (EIA / TIA Cat-5E)
- Operating temperature range from -40° to +85° C
- Shock, vibration and immersion resistant per MIL-STD-810
- Zinc nickel plating meets stringent corrosion resistance requirements
- Aluminum housings are strong, durable and light weight
- TFOCA II® compliant optical fiber connector interface
- MIL-DTL-38999 electrical interface for power and signals

APPLICATIONS

Mustang series bulkhead mounted Fast Ethernet media converters enable high speed network communications over long distances in harsh environments.

- Fast Ethernet switches and peripherals
- Telecom and datacom switch / router rack-to-rack links
- Storage or computation clusters

The TFOCA II® and D38999 shells provide sealed interfaces that are water-tight to MIL-STD-810 when mated.

The multimode optical fiber interface supports applications where copper cable link distance, bandwidth, weight or bulk make the use of twisted pair, twinax or quadrx copper conductors unacceptable.

ABSOLUTE MAXIMUM RATINGS

Absolute maximum limits mean that no catastrophic damage will occur if the product is subjected to these ratings for short periods, provided each limiting parameter is in isolation and all other parameters have values within the performance specification. It should not be assumed that limiting values of more than one parameter can be applied to the product at the same time.

Parameter	Symbol	Minimum	Typical	Maximum	Unit
Storage Temperature	T_s	-45		+100	°C
Supply Voltage	V_{cc}	-0.5		8.0	V
Data Input Voltage	V_i	-0.5		V_{cc}	V
