

FALCON SERIES

DUAL PORT DVI FIBER OPTIC MEDIA CONVERTER, D38999 28 VDC, MULTIMODE, 850 NM, QUADRAX

Falcon series DVI fiber optic transmitter consist of optoelectronic transmitter functions integrated into a bulkhead mounted MIL-DTL-38999 connector assembly. The optical transmitters are high output 850 nM VCSEL's.

The electrical interface to the Falcon series DVI fiber optic media converters is a D38999/19-18 Quadrax connector enabling interconnection to a standard DVI connector interface with a Quadrax cable adaptor.

Falcon series DVI fiber optic transmitter are vibration isolated, environmentally hardened components designed for use in harsh environment applications.

- Sealed against liquid and solid contaminants
- Shock and vibration resistant

FALCON SERIES MIL-DTL-38999, DUAL PORT DVI FIBER OPTIC TRANSMITTER, QUADRAX, MULTIMODE, 28 VDC, 850 NM VCSEL'S

Dual DVI Port, Transmitter
D38999 to Quadrax / Optical to Electrical Media Converter

FEATURES

- Optical fiber link distances up to 500 meters
- Operating temperature range from -40° to +85° C
- Shock, vibration and immersion resistant per MIL-STD-810 and MIL-STD-1344
- Olive drab cadmium plating meets stringent corrosion performance specifications
- Aluminum alloy enclosure and MIL-DTL-38999 shells are strong, durable, corrosion resistant and light weight
- MIL-T-29504 compliant optical fiber connector interface
- D38999 / Quadrax electrical interface provides robust interconnection to internal chassis wiring or backbone

APPLICATIONS

Falcon series bulkhead mounted DVI fiber optic media converters enable high speed video transmission over long distances in harsh environments.

- DVI link extension
- Remote display clusters
- Alternative display configurations

The MIL-DTL-38999, series III shell provides a sealed optical interface that is water-tight to MIL-STD-810 / IP67 / NEMA-4x when mated.

The multimode optical fiber interface supports applications where copper cable link distance, bandwidth, weight or bulk make the use of twisted pair, twinax or quadrax copper conductors unacceptable.

ABSOLUTE MAXIMUM RATINGS

Absolute maximum limits mean that no catastrophic damage will occur if the product is subjected to these ratings for short periods, provided each limiting parameter is in isolation and all other parameters have values within the performance specification. It should not be assumed that limiting values of more than one parameter can be applied to the product at the same time.
