

Subject: Product Obsolescence Announcement, Hydraulic Service Manifold

Dear [customer],

Moog is announcing obsolescence information for the Moog Hydraulic Service Manifold, HSM. This document replaces any previous product life cycle announcements for this product.

Products Affected:

- Hydraulic Service Manifold - models of Revision D with the working pressure of 210 bar (both types without and with CE compliance).
 - Model number starting with C050D4 and having working pressure code “-” and “8”. Please refer to the ordering code from the product brochure.

Product Obsolescence Arrangement Coverage and Effective Date:

This notice provides details of coverage of the arrangement and the corresponding schedule.

Date	Program Activity for HSM
December 1, 2023	Stop provide quotation to new business/projects
December 1, 2023	Stop delivery of the products
Continue until further notice	Product support and services
Continue until further notice	Product repairs and spare parts supply ¹⁾

Notes:

- 1) *Items required for repairs and spare parts supply is subject to the availability from vendors.*

There is no direct replacement (Form-Fit-Function compatible) for the HSM C050D4 models. To fulfill the same application, you may use HSM Rev.E, C050E4 models, which can provide the same functions of the C050D4. For the product specifications and the application requirements of the HSM Rev.E, please contact your local Moog Sales and Application Engineer to obtain more information.
