

Announcement

Moog to Showcase New Collaborations for Edge-Processing at Satellite 2022 *Innovation. Collaboration. Transformation.*

East Aurora, NY (March 14, 2022) – Moog Inc. (NYSE: MOG.A and MOG.B) will highlight its spacecraft technologies and new collaborations at the 41st annual SATELLITE conference in Washington, D.C. Moog will be at booth #1807 in the Walter E. Washington Convention Center March 22-24.

We are pleased to share our partnerships with Novi and Unibap. Both companies specialize in on-orbit data processing and edge-intelligence. Moog is a part owner of Novi and the exclusive seller of Unibap's core space and defense technology in the United States.

[Novi](#) combines data science and predictive analytics expertise with product development and commercialization capabilities to deliver new, highly integrated, actionable intelligence at the edge.

[Unibap](#) is a key partner in Moog's continued development of next-generation radiation-tolerant Graphics Processing space products. Moog's high-performance Space VPX heterogeneous GPU-compute products leverage

Unibap's expertise and space heritage. Unibap's SpaceCloud® cloud computing ecosystem offers on-orbit timely data generation, storage, and analytics for small to large satellites, deep space exploration, and space robotics.

Stop by booth #1807 Tuesday, March 22 and Wednesday, March 23 at 2 p.m. for live demonstrations of some of these solutions and capabilities.

Meet the Moog team at SATELLITE 2022 to discuss our innovation, collaboration, and latest research and development efforts to and shape what space will become tomorrow.

The SATELLITE Conference and Exhibition launched in 1981 with the goal to connect and unite the satellite industry as we headed toward new frontiers. In 2022, SATELLITE celebrates 41 years and is broadening the scope of content to encompass professionals in commercial markets benefiting from satellite technology and applications, such as media, government/military, aviation, maritime, healthcare, telecommunications and more. Moog will join more than 300 vendors exhibiting at SATELLITE 2022.

About Moog Inc.

Moog Inc. is a worldwide designer, manufacturer, and integrator of precision control components and systems. Moog's high-performance systems control military and commercial aircraft, spacecraft, launch vehicles, missiles, automated industrial machinery, and marine and medical equipment. Additional information about the company can be found at www.moog.com. Explore our space solutions at www.moog.com/space.
