IMMEDIATE RELEASE

Moog Inc. Extends Taiwan Distribution Agreement with AIDC

Partnership Strengthens Military Aircraft Sustainment Capabilities, Through 2031

Farnborough, United Kingdom, - Moog Inc. (NYSE: MOG.A and MOG.B) announced at the Farnborough International Airshow, the signing of an agreement with AIDC extending their exclusive distribution rights for Moog's military aircraft products in Taiwan through 2031, further strengthening the companies' long-standing partnership.

The agreement builds on a successful collaboration that began in 2024 and capitalizes upon AIDC's strong track record supporting Taiwan's defense sector. Through the partnership, AIDC will continue providing comprehensive support for military aircraft platforms, including the Brave Eagle Advanced Jet Trainer (AJT), Indigenous Defense Fighter (IDF), F-16, S-70C, UH-60M, and AH-64. Services include new spares sales, repair and overhaul, and technical support to help maintain fleet readiness.

"Moog values its long-term relationship with AIDC and the role the company plays in supporting our Taiwanese customers," said Camille Flaherty, Vice President and General Manager of Moog's Military Global Sustainment Division. "We look forward to continuing our strong partnership."

"This agreement represents an important milestone and strengthens our ability to support Taiwan's military operators," said Jennifer Chuang, President of AIDC. "We look forward to expanding our cooperation and continuing to deliver high-quality products and technical services."

Under the extended agreement, AIDC will continue coordinating sales and aftermarket support, backed by technical expertise, inspection services, engineering training, and direct support from Moog. The companies will also explore additional opportunities to expand their strategic collaboration in the years ahead.
