

OVERMATCHING PROTECTION, ENDURING STRENGTH

MULTI-DOMAIN SOLUTIONS FOR AMERICA'S GOLDEN DOME

THAAD | PAC-2/3 | AEGIS | G/ATOR | NGI | GPI | GMD/EKV | SM-2/6 | SDA PWSA

Our end-to-end design, development, and full-scale production capabilities enable deterrence through rapid demonstration and fielding at scale for the multi-domain architectures of Golden Dome. As a systems prime with relevant product heritage, we have current expertise from mission critical components and subsystems to mission-enabling LEO to GEO space vehicles. With intention, our operating processes adapt to the needs of modern commercial acquisition models, tactical solutions, and exquisite systems. We are uniquely equipped with capability and capacity, and with dedication to address the warfighter's threat responsive architectures of Golden Dome.

PRECISE PERFORMANCE WHEN IT MATTERS MOST

SPACE

Tactically Responsive Spacecraft
Low-cost Divert and Attitude
Control System (LDACS)
Satellite Propulsion
Systems and Equipment
Control Actuation Systems
Avionics

AIR, LAND, SEA

Missile Guidance and Steering
Control Actuation Systems
Attitude Control Systems
Radar and Launcher Positioning
and Leveling Systems
Integrated Navigation Sensors
Integrated GN&C Systems
