

INTELLIGENT SLIDING SYSTEM DRIVE

High efficiency and powerful building automation in a compact design

Accessories for Smooth Integration of the ISA1

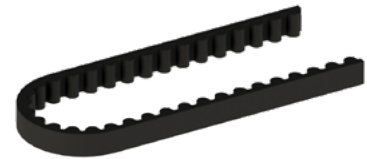

ISA HTD 8M Toothed Pulley

- Power transmission from drive to belt
- Compact design, corrosion resistant
- Drive is delivered with mounted pulley
- Feather key system allows ease of maintenance

ISA HTD 8M Toothed Belt

- Transfers drive rotation to the linear slide
- Synchronous, smooth transmission without slip
- Custom length for your application
- Polyurethane (PU) construction provides excellent abrasion and humidity resistance

ISA HTD 8M Clamping Plate

- Toothed belt ends can be attached to the sliding system
- Screw connection for simple mounting

ISA Belt Tensioner

- Tension screw for quick adjustment of the drive belt
- Compact design allows easy integration
- Mechanism is optimized for use with different belt profiles
- 40 mm length for extended adjustment range
