| Hydraulic Actuation Systems | • Valve Control  
                        • Actuation of Hatches and Locking Rings | • Rotary Actuators up to 150,000 in-lbs  
                        • Linear Rack & Pinion up to 50,000 lbs  
                        • Industry Leading Reliability  
                        • State of the Art Acoustic Performance |
| Electrohydraulic Servoactuation | • Steam Turbine Throttle Control  
                        • Emergency Shutdown Systems  
                        • Rudders & Bow Planes  
                        • Torpedo Fin Actuation | • High Speed, High Precision Motion Control  
                        • Integrated Control Unit, Servovalves, and Actuator |
| Electromechanical Actuation | • Valve Control  
                        • Steam Turbine Throttle Control | • Permanent Magnet Brushless Motor Technology  
                        • Rotary Actuators 200 to 20,000 in-lbs  
                        • Linear Actuators up to 7,000 lbs  
                        • Controllers up to 150kW  
                        • Mil-STD-461 EMI Compliant  
                        • Mil-S-901 Shock Capability |
